"Fighting For Patient Safety"

Protecting Your Patient from Infections Acquired
in Healthcare Settings Takes Extra Power

- BD Persist™ Skin Prep helps you lay the safety foundation for your IV catheter start by providing you and your patient up to seven day antimicrobial efficacy
- Join in the fight against nosocomial infection by prepping with BD Persist™ Skin Prep for an effective IV start

BD

Helping all people
live healthy lives

Povidone Iodine Foundation

Povidone iodine remains on the skin to deliver continuous antimicrobial activity and protects the skin by reducing irritation caused by dressing adhesives.

Fast and Easy One-Step Application

Provides a single-solution application with a dry time of approximately 45 seconds. This reduces both the number of steps and time required to adequately prepare the site.

Swab Applicator

A well-known standard for solution delivery for site preparation.

BD Persist Formulation

Alcohol, povidone iodine and a polymer provide a fast-acting and broad-spectrum kill as well as long-term efficacy and skin protection.

Light Caramel Color

Distinguishes prepped area without masking the site.

BD Persist™ Skin Prep 10% PVP-I and 70% Alcohol
