

A photograph of a person's legs from the mid-thigh down to the feet, wearing black, knee-high compression socks. The legs are positioned diagonally across the frame, with the right leg in front of the left. The background is a plain, light color.

Full-line Compression Products

New From CURAD®

Hospital-Quality Compression Hosiery from a Brand People Trust

Compression therapy is recommended by hospitals and physicians to help prevent DVT and for other indications. Today, consumers are seeking relief on their own for tired, achy legs. Athletes, travelers, pregnant women and workers on their feet all day are all looking for the kind of added leg support that CURAD compression hosiery delivers.

The CURAD name boosts sales

In a survey, 77 percent of all participants recognized the CURAD brand name.¹ As a dealer of CURAD compression garments, you will be providing instant name recognition for your customers.

In addition, a \$4 million national marketing campaign integrating TV and radio spots, magazine print ads, billboards and promotional events is reinforcing the CURAD name and familiar green box even further in consumers' minds. That's an added bonus for retailers.

¹ TNS Survey. Sponsored by TABS Group. August 2008. Data on file.

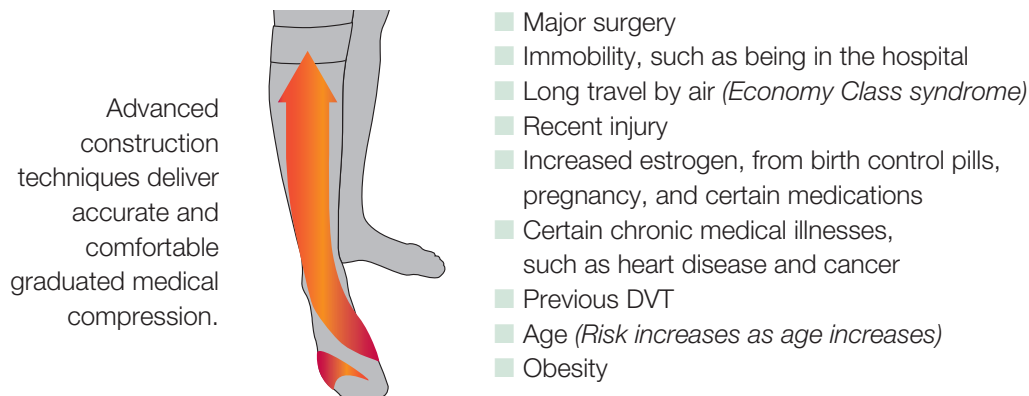

The 2' (61cm) valence board, item CURCOMPVAL2, perfectly tops off this two foot planogram.

Venous Disease: Know the Risks

Venous disease occurs when the walls and one-way valves in veins, usually in the legs, become damaged. This damage allows blood to pool and causes veins to swell, making the problem worse. The resulting venous disease can be relatively minor, such as with varicose veins or tired, achy legs. More serious levels of venous disease include superficial and deep thrombophlebitis (also called DVT), which can cause serious complications including pulmonary embolism (PE).¹

DVT and PE are often under diagnosed. They are serious, but preventable medical conditions. It is important to know about DVT because it can happen to anybody at any age. Factors that increase the risk of developing DVT include:²

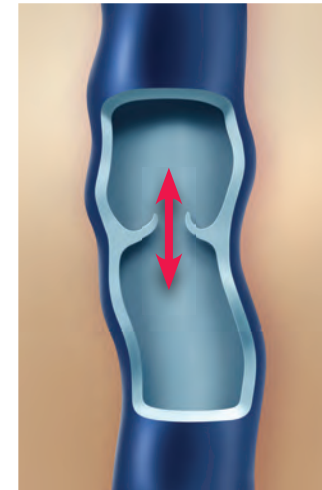

Prevention is preferable to treatment. When prevention through exercise such as walking or muscle flexing is not enough, doctors look to two potential interventions: anti-coagulation medications and lower limb compression.

² Centers for Disease Control website. <http://www.cdc.gov/features/thrombosis>. Accessed June 9, 2011. August 2008. Data on file.

Varicose veins are caused by damaged or diseased valves, which result in backward flow of blood in your legs, a condition known as superficial venous reflux. This can cause blood to pool in your legs and lead to symptoms such as pain, swelling and varicose veins.

CURAD® Hospital-Quality Medical Compression Knee-High Hosiery

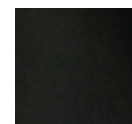

Therapy Choices

- 8-15mmHg:** Medical support stocking (sock) designed to provide controlled pressure to the leg.
- 15-20mmHg:** Helps to prevent edema and leg discomfort, and helps to prevent deep vein thrombosis (DVT) in individuals subjected to immobility.
- 20-30mmHg:** Helps to prevent the pooling of blood in the legs and apply controlled pressure to the legs.
- 30-40mmHg:** Helps to prevent edema and leg discomfort and helps to prevent deep vein thrombosis especially for long distance travelers and those on their feet for extended periods of time.

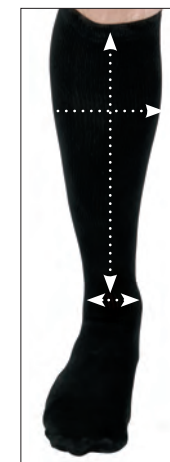

Please consult a physician to recommend the compression level best suits for your condition.

Beige

Black

Length

Measure from the bend in the knee to the bottom of the heel.

Calf Circumference

Measure around the widest point of the calf.

Ankle Circumference

Measure around the ankle bones.

Swollen legs and extra sensitive skin makes getting regular hosiery on and off a challenge. The answer may just be a CURAD compression garment featuring moderate compression and a pinch-resistant, easy-pull zipper.

CURAD® Hospital-Quality Post Surgical Mammary Compression Dressing

Adjustable straps with hook & loop closures

For easy access and quicker dressing changes

Built-in crisscross back for posture support

Removable and adjustable pouch on each side

to accommodate drains or pain pumps

3-piece cups with flat seams provide superior fit and support

Front zipper opening for fast and easy exams

Support, coverage and protection — *all in one dressing*

- Maximum support and security
- Coverage and protection of incisions
- Unrestricted range of motion
- Easy access for post-operative examination

Constructed of soft, single-knit nylon and Lycra® spandex, the CURAD Post Surgical Mammary Compression Dressing is recommended for recovery from breast surgeries (augmentation, biopsy, lumpectomy, mastectomy, reconstruction, reduction), open heart operations and other chest surgeries.

A front zipper opening and adjustable straps with hook & loop closures provide access to the surgical site for easy inspection and dressing changes. Removable and adjustable pouches with hook & loop straps accommodate drains or pain pumps. A wide elastic waistband offers maximum support, and wide side panels cover and protect incisions. Adjusts to accommodate many widths.

Item #	Size	Circum. Under Breast + 1"	Qty
NONMAMCOMP1	Small	32" – 34" (81.2 – 86.4 cm)	1 ea
NONMAMCOMP2	Medium	34" – 36" (86.4 – 91.4 cm)	1 ea
NONMAMCOMP3	Large	36" – 38" (91.4 – 96.5 cm)	1 ea
NONMAMCOMP4	X-Large	38" – 40" (96.5 – 101.6 cm)	1 ea
NONMAMCOMP5	XX-Large	40" – 42" (101.6 – 106.7 cm)	1 ea
NONMAMCOMP6	3XL	44" + (106.7 cm +)	1 ea

A portion of the proceeds from the sale of each compression dressing will be donated to the National Breast Cancer Foundation to fund mammograms for underserved women.

Prescription Pad

Send this to your prescribing partners to help them request CURAD hosiery or compression bras for their patients. LIT838

Swatches

Hang this in your store to help your customer determine which fabric and color they prefer. Item# MDSSWATCHRNG.

Reorder Cards

Build repeat business! Have your customer fill out the information card at the time of purchase. Then send Medline their cards. After 6 months, at no charge to you, Medline will mail your customer a reminder to come back to your store to purchase new hosiery.
