

DATUM[®]
storage solutions

4Post[™]

Adaptable. Flexible. Durable.

4Post is a storage solution built for strength, longevity, and flexibility. Designed to store virtually anything, and responsive enough to accommodate any size and weight, 4Post is the storage solution to get organized and keep your storage easily accessible.

Configure 4Post to maximize space and efficiency and know that it is engineered for effortless installation, easy expansion, and lasting endurance.

Distinct, manageable design.

4Post's exceptional strength and durability comes from several factors of its construction. The interlocking keyhole uprights, combined with double rivet shelf supports and heavy gauge shelves, are a key component to offering maximized strength.

The unrivaled adaptability of 4Post is also thanks to its unique design. Custom sizing and shelf spacing, "mobile-ready" components, and the ability to expand all make 4Post the ideal solution for storage needs across any market.

1 Custom Sizes

Datum offers more sizes of 4Post shelving than any other manufacturer. Widths ranging from 24" to 48" and depths from 9" to 36", plus custom widths, heights, and depths, ensures a perfect fit.

2 Adaptable Design

Shelves are fully adjustable, allowing users to store anything from boxes, books, and files to hanging or folded garments, museum artifacts, sports equipment, and more.

3 Unique Uprights

Constructed of 18 gauge steel, the uprights in 4Post are designed for flexibility in configuration, offering shelf positioning on 1-1/2" centers.

4 Durable Finish

All 4Post parts are finished with a textured powder coat that withstands daily wear and tear, preventing scratched and corrosion.

5 Reinforced Support

All shelves are equipped with two heavy duty double rivet shelf supports for optimum weight capacity.

6 Mobile Ready

Prepunched tops and single rivet bottom shelf supports ensure easy installation to Datum's TrakSlider or MobileTrak systems without the need for drilling.

7 Dividers

Adjustable on 2" centers to keep stored materials, like books and files, upright and organized.

Maximum storage capacity for minimal spaces.

Combining 4Post with one of our mobile, high density filing systems maximizes space-saving efficiency, even in the smallest of spaces. Our mobile systems are designed to remove the need for multiple aisles, allowing storage to fit in tighter spaces.

Completely customize your high density storage solution to meet your storage needs now, and be confident that your new system can be expanded to meet your growing needs in the future.

MobileTrak®

Reduce floor space requirements by up to 50% by combining 4Post with a MobileTrak system. For maximum space saving anywhere, choose a MobileTrak5 system. If height restrictions are a concern, opt for a MobileTrak3.

No matter what you choose, Datum's MobileTrak storage solutions provide increased efficiency and unique customization options to handle any need.

TrakSlider™

Easily convert your stationary shelving to a space efficient, storage expanding TrakSlider system.

BiSlider, TriSlider, and QuadSlider system configurations ensure increased storage capacity while conserving the space you have.

Accessories make the system.

Compliment your 4Post system and customize your experience with our selection of accessories. Doors, drawers, garment rods, roller shelves, and specialty racks are just a few of the components you can choose from to enhance the usability of your 4Post system.
