

Hybrid™ Universal Interface

A Fusion of Comfort and Innovation

The Hybrid is a unique fusion of technologies, designed to be a **universal interface for patients, clinicians, and providers**. This one product serves as a nasal interface, an oral interface, and a combination of the two. The **Hybrid is a dual – airway interface** for use with positive airway pressure devices for the treatment of respiratory insufficiencies and obstructive sleep apnea.

The unique design of the Hybrid promotes patient comfort by **eliminating pressure points** on the forehead and across the bridge of the nose.

The Hybrid complete system **contains all of the components required to properly size the patient**, eliminating the hassle of opening multiple packages to get the right fit.

Hybrid
Nasal/Oral
CPAP Mask

Performance Features

- Built-in chin flap **gently supports the chin** and keeps the mouth closed; eliminating the need for a chin strap
- Premium headgear provides five points of adjustability to provide **better fit, seal and increased support**
- Quick connect/disconnect on headgear enables **easy removal and application**
- Patients can wear their glasses while wearing the interface

Design Features

- 100% latex free
- One package contains all of the components required to properly size the patient, eliminating the hassle and waste of opening multiple products to properly fit the patient
- **Universal design simplifies choice and fitting protocols** and minimizes time spent with a patient to address issues such as mouth breathing or claustrophobia
- Adjustable nasal pillow design provides a **customized fit for each patient**
- No nasal bridge or forehead contact eliminates nasal bridge sores and air leaks near eyes
- Swivel tubing coupler to accommodate free movement and optimal performance during the night
- Supplemental oxygen ports
- Patient Instructional DVD and carrying case included with each complete system
