

Blood Pressure Kit

Trust in Dynarex for Patient Care

Dynarex Blood Pressure Kits include a single or dual-head stethoscope and an adult sphygmomanometer. The stethoscope is sleek, durable, and lightweight with a non-chill, anodized chest piece. It features 22" latex-free PVC tubing with an adjustable binaural. The 300mmHg sphygmomanometer is chrome-plated, easy to read and has an air-release valve.

The stethoscopes, single or dual, are available separately, as are the sphygmomanometers in a range of cuff sizes.

Depending on market demand and Dynarex stock, we will be happy to address any orders for items/sizes currently not shown.

Single or
dual head
stethoscopes
