Ostomy Care

HCPCS Codes Disclaimer

The reimbursement information provided herein is intended to provide general information concerning coding of Hollister products only. Hollister does not guarantee coverage or payment for any products. The ultimate responsibility for proper coding, satisfying reimbursement requirements, and obtaining reimbursement remains with the provider. Coding and coverage policies and guidelines are complex, can vary from one carrier or region to another, and are updated frequently. Providers should check with their local carriers or intermediaries often and should consult with counsel, a reimbursement specialist, and/or the DMECS website for any coding, coverage, reimbursement, or billing questions.

HCPCS codes shown in this Product Catalog are current as of 1-6-12.

Explanation of Third Party Code Reimbursement System (National Health Related Items Code)

To facilitate reimbursement of Hollister products, some Third Party Payment Programs require the use of an eleven-digit reimbursement number. Every Hollister manufactured product can be identified by an eleven-digit number. In general, the first five numbers identify the manufacturer's labeler code, and the last six numbers represent the product stock number. The labeler code for Hollister Incorporated is 08380. The labeler code for Hollister Wound Care LLC is 08567, and the labeler code for the Apogee product line is 08598. In order to utilize this coding system, follow these examples.

To code a four-digit stock number:

The Third Party Reimbursement Number for the Apogee 12 Fr Intermittent Catheter, Stock Number 1048 listed in the catalog on page 92, is:
08598-0010-48

08598 identifies Apogee. 0010-48 identifies the product Stock Number.

To code a five-digit stock number:

The Third Party Reimbursement Number for the New Image Drainable Pouch, Stock Number 18113 listed in the catalog on page 30, is:
08380-0181-13

08380 identifies Hollister Incorporated. 0181-13 identifies the product Stock Number.

To code a six-digit stock number:

The Third Party Reimbursement Number for the Restore Contact Layer Dressing with TRIACT Technology, Stock Number 509338 listed in the catalog on page 130, is:
08567-5093-38

08567 identifies Hollister Wound Care LLC. 5093-38 identifies the product Stock Number.

Additionally, three products in the Hollister Wound Care line require an NDC number due to their Dimethicone-based nature. The labeler code for their OTC drug products is 42828. The three NDC numbers are listed below.

NDC	Stock No.	Description
42828-9977-02	529977	Restore Cleanser & Moisturizer, 7.5 oz
42828-9978-03	529978	Restore Cleanser & Moisturizer, 11.5 oz
42828-9979-01	529979	Restore Dimethicreme Skin Protectant, 4 oz

Latex Statement

The specifications for the Hollister Continence Care products listed below include natural rubber latex as a component; our suppliers add natural rubber latex as part of the production process.

If a Hollister product(s) found in this catalog is not listed below, the specification for that product(s) and packaging does not include natural rubber latex as a component, and our component suppliers do not add natural rubber as part of their production process.

Current Stock Numbers:

1051	9107	9207	9835 §	B12RB
1067	9108	9208	B12R	B14RB
1084	9109	9209	B14R	B16RB
9106	9206	9834 §	B16R

How to Use The Hollister Products Catalog

Hollister has created this simplified Product Catalog to help our customers find what they need in a quick and efficient manner.

If you...
know the stock number (or stock series number)

If you...
know the product brand or series name

If you...
know the HCPCS code

---

† Product Discontinued as of July 2007

‡ Product Discontinued as of January 2009

* Product Discontinued as of September 2009

§ As of February 2009, this product has been redesigned to exclude natural rubber latex either as a component or from the production process. The packaging/insert of the new non-latex version of the product will not contain a latex statement. Please verify the latex status of the individual product prior to use by reviewing the packaging and product insert for a latex statement. A latex statement indicates the product is from the previous latex version.

Medicare's Usual Maximum Quantity for Ostomy Supplies

The quantity of ostomy supplies needed by a patient is determined primarily by the type of ostomy, its location, its construction, and the condition of the skin surface surrounding the stoma. There will be variation according to individual patient need and their needs may vary over time. The table below lists the maximum number of items/units of service that are usually medically necessary. The actual quantity needed for a particular patient may be more or less than the amount listed depending on the factors that affect the frequency of barrier and pouch change. The medical necessity for use of a greater quantity of supplies than the amounts listed must be clearly documented in the patient's medical record, and must be available upon request. If adequate documentation is not provided when requested, the excess quantities will be denied as not medically necessary.

Per LCD for Ostomy Supplies (L11502), NHIC effective 1-1-2011. New Ostomy Codes added effective 1-1-2012.

HCPCS	Long Description	Quantity
A4331	Extension drainage tubing, any type, any length, with connector/adapter, for use with urinary leg bag or urostomy pouch, each	∗
A4357	Bedside drainage bag, day or night, with or without anti-reflux device, with or without tube, each	2 ea /mo
A4361	Ostomy faceplate, each	3 ea/6 mo
A4362	Skin barrier, solid, 4 x 4 or equivalent, each	20 ea/mo
A4363	Ostomy clamp, any type, replacement only, each	∗
A4364	Adhesive, liquid or equal, any type, per ounce	4 oz/mo
A4366	Ostomy vent, any type, each	∗
A4367	Ostomy belt, each	1 ea/mo
A4368	Ostomy filter, any type, each	∗
A4369	Ostomy skin barrier, liquid (spray, brush, etc.), per ounce	2 oz/mo
A4371	Ostomy skin barrier, powder, per ounce	10 oz/6 mo

A4390	Ostomy pouch, drainable, with extended wear barrier attached, with built-in convexity (1 piece), each	*
A4391	Ostomy pouch, urinary, with extended wear barrier attached (1 piece), each	*
A4392	Ostomy pouch, urinary, with standard wear barrier attached, with built-in convexity (1 piece), each	*
A4393	Ostomy pouch, urinary, with extended wear barrier attached, with built-in convexity (1 piece), each	*
A4394	Ostomy deodorant, with or without lubricant, for use in ostomy pouch, liquid, per fluid ounce	*
A4395	Ostomy deodorant for use in ostomy pouch, solid, per tablet	*
A4396	Ostomy belt with peristomal hernia support	*
A4397	Irrigation supply, sleeve, each	4 ea/mo
A4398	Ostomy irrigation supply, bag, each	2 ea/6 mo
A4399	Ostomy irrigation supply, cone/catheter, with or without brush	2 ea/6 mo
A4402	Lubricant, per ounce	4 oz/mo
A4404	Ostomy ring, each	10 ea/mo
A4405	Ostomy skin barrier, non-pectin based, paste, per ounce	4 oz/mo
A4406	Ostomy skin barrier, pectin-based, paste, per ounce	4 oz/mo
A4407	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, with built-in convexity, 4 x 4 inches or smaller, each	*
A4408	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, with built-in convexity, larger than 4 x 4 inches, each	*
A4409	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, without built-in convexity, 4 x 4 inches or smaller, each	*
A4410	Ostomy skin barrier, with flange (solid, flexible, or accordion), extended wear, without built-in convexity, larger than 4 x 4 inches, each	*
A4411	Ostomy skin barrier, solid 4 x 4 or equivalent, extended wear, with built-in convexity, each	*
A4412	Ostomy pouch, drainable, high output, for use on a barrier with flange (2 piece system), without filter, each	*
A4413	Ostomy pouch, drainable, high output, for use on a barrier with flange (2 piece system), with filter, each	*
A4414	Ostomy skin barrier, with flange (solid, flexible, or accordion), without built-in convexity, 4 x 4 inches or smaller, each	20 ea/mo
A4415	Ostomy skin barrier, with flange (solid, flexible, or accordion), without built-in convexity, larger than 4 x 4 inches, each	20 ea/mo
A4416	Ostomy pouch, closed, with barrier attached, with filter (1 piece), each	60 ea/mo
A4417	Ostomy pouch, closed, with barrier attached, with built-in convexity, with filter (1 piece), each	60 ea/mo
A4418	Ostomy pouch, closed, without barrier attached, with filter (1 piece), each	60 ea/mo
A4419	Ostomy pouch, closed, for use on barrier with non-locking flange, with filter (2 piece), each	60 ea/mo
A4420	Ostomy pouch, closed, for use on barrier with locking flange (2 piece), each	60 ea/mo
A4421	Ostomy supply; miscellaneous	*
A4422	Ostomy absorbent material (sheet/pad/crystal packet) for use in ostomy pouch to thicken liquid stomal output, each	*

*No established usual maximum, refer to Medicare Utilization Guidelines.

HCPCS	Long Description	Quantity
A4423	Ostomy pouch, closed, for use on barrier with locking flange, with filter (2 piece), each	60 ea/mo
A4424	Ostomy pouch, drainable, with barrier attached, with filter (1 piece), each	20 ea/mo
A4425	Ostomy pouch, drainable, for use on barrier with non-locking flange, with filter (2 piece system), each	20 ea/mo
A4426	Ostomy pouch, drainable, for use on barrier with locking flange (2 piece system), each	20 ea/mo
A4427	Ostomy pouch, drainable, for use on barrier with locking flange, with filter (2 piece system) each	20 ea/mo
A4428	Ostomy pouch, urinary, with extended wear barrier attached, with faucet-type tap with valve (1 piece), each	∗

How to Size Hollister Ostomy Pouches

A properly fitted pouch is essential to minimize stomal and skin irritation and to obtain optimum pouch wear time. A stoma measuring guide allows correct measurement of the stoma. Measure the stoma accurately. Select the smallest barrier opening which fits comfortably around the stoma without actually touching it. Too large an opening will leave skin exposed and could lead to skin irritation or erosion.

New Image Two-Piece Pouching System

New Image

**Two-Piece
Pouching System**

New Image Two-Piece Pouching System

Color Matching System

To help you select compatible New Image components, every box label is color-coded. First, select the proper skin barrier; then select a matching color-coded pouch ("red" skin barrier box label is compatible to "red" pouch box label).

FormaFlex Shape-to-Fit Skin Barrier
(Part of the **New Image** product line)

This convenient, versatile skin barrier is simple to shape and reshape by hand for a customized fit around various stoma sizes. No measuring, no tracing, no cutting.

The barrier is specially formulated to be soft and flexible enough for users to attain just the right fit, and strong and gentle enough to firmly adhere around the stoma.

All FormaFlex Shape-to-Fit Skin Barriers have a 5/8" starter hole.

FormaFlex Skin Barrier —
Simple to shape.

Did you know…

- Cut-to-fit products have a 1/2" (13 mm) starter hole and can be used as a pre-sized product for some small stomas (excludes Pouchkins products)
- Cutting guides are provided on all cut-to-fit barriers
- Drainable pouches without the Lock 'n Roll Closure include one pouch clamp per box
- We do not recommend the use of Skin Gel Wipes (Stock No 7917) or other brands of skin preps with Flextend Skin Barriers as they may decrease wear time

HCPCS: A4362

Stock No	Size
7700	4 x 4" (10 cm x 10 cm)

Letter Matching System

To help you select compatible CenterPointLock Two-Piece System components, every CenterPointLock System product box label features a letter designation: Ⓗ, Ⓘ, Ⓙ, Ⓚ, or Ⓛ. Once you've selected a CenterPointLock Two-Piece System Skin Barrier, select a pouch, irrigator drain, or stoma cap with a matching letter on the box label.

Closed Pouches

314x (PRE-SIZED)   **Box of 30**
▶ Closed Mini-Pouch, Tape Adhesive, Integrated Filter, Odor-Barrier Film, Without ComfortWear Panels

HCPCS: A4418

Transparent

Stock No	Barrier Opening	Pouch Length
3142	1" (25 mm)	7" (18 cm)
3148	1-1/4" (32 mm)	7" (18 cm)
3143	1-1/2" (38 mm)	7" (18 cm)
3149	1-3/4" (44 mm)	7" (18 cm)
3144	2" (51 mm)	7" (18 cm)

Stoma Cap

318x (PRE-SIZED)   **Box of 30**
▶ Stoma Cap, Tape Adhesive, Integrated Filter, Odor-Barrier Film, Without ComfortWear Panels

HCPCS: A5055

Beige

Stock No	Opening	Size
3184	2" (51 mm)	4-1/4" (11 cm)
3186	3" (76 mm)	4-1/4" (11 cm)

AF300 Filter: "AF" stands for Air Flow and "300" represents the 300 mm^2 air flow surface area on every AF300 Filter

Closed Pouch: A pouch without a spout or a clamp. Quick and easy to discard. It must be removed to be emptied

Colostomy: An ostomy (surgical opening) created in the colon, part of the large intestine

ComfortWear Pouch Panels: Lining over the plastic of the pouch to enhance comfort and discretion. The soft pouch panels may be on one or both sides of the pouch

Convex Skin Barrier: May be used when the stoma does not protrude from the abdomen. The skin barrier is shaped to press more deeply around the stoma

Cut-to-Fit Skin Barrier: A skin barrier that can be cut to the right size and shape for the stoma by using a scissors

Drainable Pouch: A pouch with an opening at the bottom. An integrated closure or clamp is used to keep the pouch closed until it's time to empty it

Extended Wear Skin Barrier: Skin barriers with special additives that achieve a stronger adhesive seal and are more resistant to breakdown. Skin barrier of choice for urostomies and ileostomies. Flextend and FormaFlex are examples. It is not recommended to use skin-prepping agents under extended wear skin barriers

Filter: Lets gas but not odor out of pouch. The key performance factors of any filter are air flow, deodorization, and liquid protection

Flange: The plastic ring in a two-piece ostomy system that is used to connect the two parts together

Flat Skin Barrier: May be used when the stoma does protrude from the abdomen

Flextend Skin Barrier: Flextend is an extended wear skin barrier that is durable and offers high resistance to erosion. It swells when it comes in contact with liquid to help form a seal between the skin and the stoma. It offers strong adhesion and flexibility

FlexWear Skin Barrier: FlexWear is a standard wear skin barrier that provides moderate adhesion, and offers a good balance of durability and gentleness. It is designed to be worn more than one day and tends to hold its shape in the presence of fluids

Floating Flange: Allows for fingers to be put under the flange for support while attaching the pouch to the barrier on a two-piece pouching system. The New Image system has an integrated floating flange

FormaFlex Skin Barrier: An extended wear skin barrier which is resistant to discharge. It has the ability to be stretched to fit the size and shape of the stoma without the use of a scissors. Found as an option in the New Image two-piece system

Ileostomy: An ostomy (surgical opening) created in the small intestine

Irrigation: A procedure used to control the time of elimination from colostomy. It is not for everyone and requires special equipment and teaching

Karaya 5 Skin Barrier: Karaya is a natural skin barrier that is well-suited for thin, fragile, and sensitive skin or in some cases where irritant dermatitis has occurred. It is mildly adhesive and needs a belt or tape to secure the pouching system

Lock 'n Roll Microseal Closure: An integrated system for closing the bottom of drainable pouches. This system utilizes plastic interlocking microseals to create a secure closure. Found on New Image, Premier, and Pouchkins drainable pouches

Odor-Barrier Pouch: Odor-Barrier Pouch is highly resistant in allowing odors to pass through the pouch film. The Odor-Barrier quality increases confidence when wearing a pouch

Pre-Sized Skin Barrier: A skin barrier that is already cut to the proper size if stoma is round

QuietWear Pouch Material: A Hollister Technology that is comprised of a pouch film and ComfortWear panel that are laminated together. This special design results in the reduction of the pouch rustling noise

Rustle-Free Pouch: Rustle-Free Pouch provides for ultimate discretion since the pouch does not make noise during normal wear

Shape-To-Fit: A skin barrier that can be stretched to the shape and size of the stoma. This skin barrier does not require use of a scissors. A possible choice when the stoma is not round or still changing sizes

Skin Barrier: Portion of the pouching system that protects the skin from contact with the discharge. It also provides an adhesive attachment for the pouching system to the body. Examples include Flextend, FlexWear, SoftFlex, and FormaFlex

SoftFlex Skin Barrier: SoftFlex is a standard wear skin barrier, which has an adhesive that is gentle to the skin, and allows for frequent pouch changes. It offers lower erosion resistance, and is thin and flexible without compromising security

Standard Wear Skin Barrier: Provides a gentle adhesive attachment to the skin. These skin barriers absorb less and disintegrate faster than extended wear skin barriers. Examples include FlexWear and SoftFlex

Stoma: The place where the drainage comes out of the body when you have an ostomy. The stoma is red and moist and doesn't have feeling

Urostomy: An ostomy (surgical opening) created to drain urine

Urostomy Pouch: Pouch with a drain tap at the bottom so urine can be emptied quickly and easily

Wear Time: Wear time is the length of time a product can be worn before failure. Wear time varies widely based upon a variety of factors

Educational Resources

Secure Start

Secure Start services are here for your patients every step of the way offering:

- Dedicated Support
- Education & Resources
- Insurance Matching
- Ostomy Products
