MEDLINE **TEXTILES**  
For Healthcare Professionals

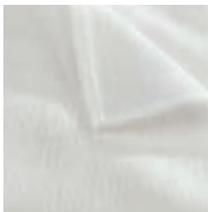

## Welcome To Medline

Medline Industries, Inc. was founded in 1966, but its roots date back 100 years to when it started as a garment manufacturer.

Today, Medline is the largest supplier of textiles to the healthcare marketplace. You will find the finest in blankets, sheets, towels and apparel at Medline. We also offer an exclusive “Feels Like Home” product line, elegant sheets and ultra-soft blankets and towels designed to pamper patients.

And always aware of our carbon footprint, we are proud to offer Energy Efficient Textiles – synthetic products constructed with innovative fiber technology.

## Look for the greensmart logo on products throughout this catalog.

Greensmart products go through a rigorous review and certification for sustainability throughout the entire product lifecycle, from production and transport through use and disposal.

### The greensmart Program: Sustainable Products, Consulting, Education and More

The greensmart program from Medline helps you quantify and report your ongoing sustainability efforts—both financially and environmentally. Because sustainability isn't only about doing what's green, it's also doing what's smart.

We call that being ecofriendly and economical. More information is at [www.medline.com/greensmart](http://www.medline.com/greensmart).

## PerforMAX™: The Future of Textiles

The PerforMAX line of textiles from Medline is designed to look better, perform longer, and save resources with every washing. This is not your father's 1970s polyester; the advanced polyester fabric in our scrubs, gowns and sheets feels great and keeps you cool and comfortable. OR towels and underpads are absorbent, soft and virtually lint-free. The ringspun towels add a bit of cotton for plushness and absorbency. Yet all PerforMAX textiles wash with less energy and dry in a fraction of the time.

## Medline's Best-Selling Soft-Fit® Knitted Contour Sheets

Soft-Fit provides exceptional patient comfort while potentially reducing laundry costs. Made of 55% combed cotton/45% polyester, these soft sheets provide maximum resident comfort and minimize the chance of skin breakdown. The cotton yarns are taken through a "combing" process to ensure that we use the strongest and finest yarns. Since these sheets are knitted instead of woven, they come out of the dryer virtually wrinkle-free with no need for ironing. Now constructed with Spandex in the binding to provide an even better fit to the mattress. All Soft-Fit knitted sheets have a 14" gusset.

## Medline Soft-Span™ Knitted Contour Sheets

Featuring Medline's technological breakthrough! It all starts with a unique knitting process that inserts hyper-elastic Spandex yarns into the Soft-Span material. We have developed what may be health care's longest-lasting contour sheets. Soft-Span has stronger elasticity to better fit all sizes of healthcare mattresses, with or without foam overlays. These sheets have excellent memory retention allowing them to cling to the mattress and eliminate folds that could create extra pressure under a patient. The strength of the Spandex fibers gives this product exceptional durability and greatly reduces pinholing that can be a common concern with knit sheets. 55% combed cotton/41% polyester/4% spandex. The 19 oz, 21 oz, and 24 oz Soft-Span sheets will fit a bed up to 48" wide and 88" long.

# The Medline Space Saver Program\*

Pillows that feature the Space Saver symbol undergo a unique vacuum packaging process that reduce carton sizes by 50%. This results in smaller cartons for delivery and space-saving storage for our customers. But rest assured – when removed from their packaging, the vacuum-packed pillows quickly plump back up to their full size for maximum patient comfort four hours after being removed from the packaging.

## Nylex Ultra Pillow

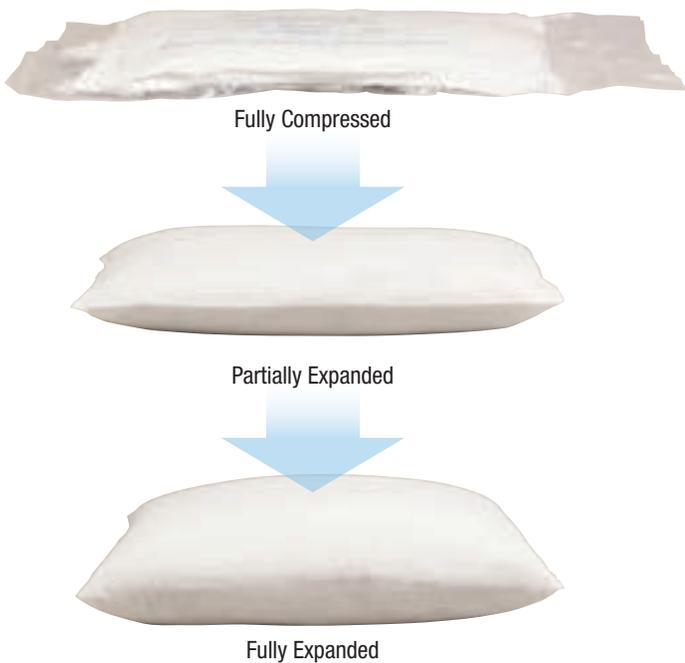

**Takes up to 50% less storage space yet plumps up for full-size comfort**

Quite possibly the ultimate healthcare pillow... our Nylex Ultra Pillow is packed with many quality features including fluid-proof woven nylon ticking and antimicrobial-treated fill. The Nylex Ultra is also flame-resistant and stain-resistant. It features a unique packaging process that vacuum packs the pillow for a 50% reduction in carton size, resulting in smaller cartons for delivery and storage. When removed from the packaging, it plumps up to a full-size pillow for maximum patient comfort. Please allow up to 4 hours for pillow to fully expand.

## Medline Antimicrobial Nylex II Pillows

### Exceptional in comfort and durability

Wipeable Nylex II ticking is an extremely soft, woven nylon that is quieter, more flexible, and generates less heat buildup than conventional vinyl ticking. It's also fluid-proof, flame-retardant, antimicrobial, mold and mildew-resistant, and antistatic. The nylon ticking has an antimicrobial treatment designed to last the life of the pillow. The Nylex II features Medline's unique Med-Vent breathing system that eliminates the need for metal vents or perforated fabric. This pillow does an outstanding job of resisting fluid penetration. Metal grommets, which allow for convenient hanging and storage, are an optional feature on the 20" x 26" pillow. Please call your Medline sales rep for additional information.

## 100% Polyester Mattress Pads

### Progressive mattress pads

Progressive Mattress Pads are 100% polyester felt for faster drying and lowest shrinkage of any felt pads available. Edges are whip-stitched to help prevent unraveling. The fitted pad is contoured to fit around the mattress, while the bleached pad features anchor bands to fasten the pad to the mattress. The anchor bands serve to keep the pad flat and secure on the bed.

# Our Maximum Performance Underpad

## PerforMAX™ Underpads

The underpad features a Swift-Dry top layer that wicks fluid in quickly and moves it to the center core. Super absorbent core disperses fluid throughout the pad so the top feels dryer quicker. The bonded bottom layer anchors the pad, giving it needed structure. Bonded construction thins the pad for less bulkiness with no decrease in absorption. Our special lamination process results in an underpad that lays flat with no bunching or rolling. PerforMAX™ pads resist stains and can be cleaned faster and easier, conserving energy and water so you will get more uses per pad before the pad is discarded.

Item No.	Description	Pkg
MDTIU7SEFBLU	PerforMAX™ LT 34" x 36", Poly, Moderate Soaker	2 dz/cs
MDTIU7SCFGRE	PerforMAX™ 30" x 36", Poly, Heavy Soaker	2 dz/cs
MDTIU7SDFBLU	PerforMAX™ 32" x 36", Twill, Heavy Soaker	2 dz/cs
MDTIU7SEFGRE	PerforMAX™ 34" x 36", Poly, Heavy Soaker	2 dz/cs

The PerforMAX LT is the only reusable incontinent pad from Medline that does two things at once:

- 1) Contains fluid
- 2) Allows perspiration vapor to escape in order to maintain a cool, comfortable temperature under the patient

### What is Moisture Vapor Transmission Rate?

Moisture Vapor Transmission Rate (MVTR) is a measure of the passage of water vapor through a substance.

### Why is this important for incontinent pads?

Pads that allow for moisture vapor to pass through the barrier reduces heat and moisture build up from perspiration keeping the patient more comfortable.

### Is the pad still fluid-proof?

Yes. Moisture vapor molecules are much smaller than water molecules. Moisture vapor can get through, but fluid is contained in the pad.

## Sofnit® 300 Reusable Underpads

## Blockade Bags

### Our most popular reusable bag

These bags are 100% polyester and provide a high level of fluid-protection due to the calendaring of the fabric. Under OSHA regulations, these bags are compliant to bagging and transporting soiled linens. The bags retain their fluid-resistant properties for 75 processings, which means their cost per use is very low. These bags are made with a straight bottom, bound side seams, and dumping loops. Available in an 18" (30" x 40") or 25" (40" x 35") flip top with elastic style closure or in the chair back style (27" x 35").

# REASONS TO CHOOSE MICROFIBER

## The Medline Microfiber Advantage

Medline's microfiber products are durable, versatile and simple to use. Our microfiber leaves the surfaces at your facility sparkling clean to reduce the risk of cross-contamination.

From mops to high dusters and glass towels, Medline has a complete range of microfiber products to suit your cleaning needs.

1

Strong, lint-free, ultra-fine fiber

2

Polyester/polyamide fibers that are split to  $\frac{1}{16}$  the diameter of a human hair for exceptional performance

3

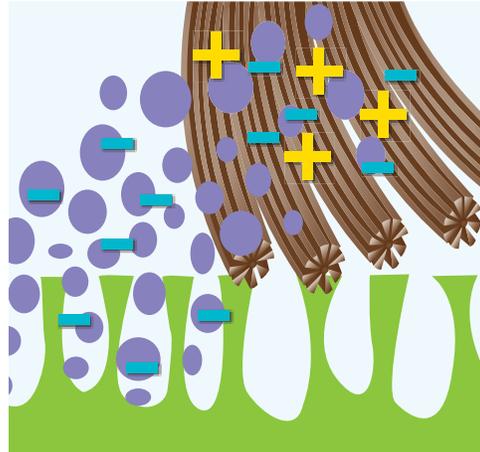

A dense matrix that enables microfiber products to hold six times their own weight in fluid

4

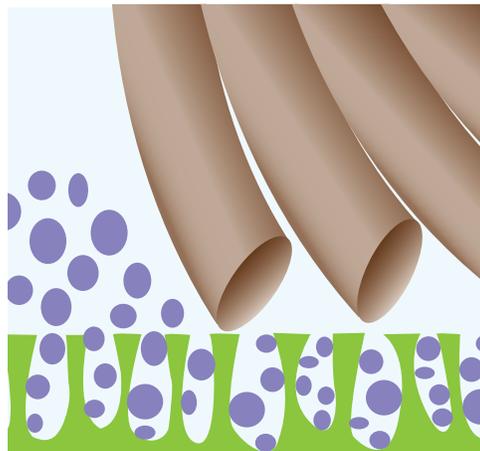

Splitting fibers creates hundreds of thousands of microscopic channels that capture, absorb and remove dust

5

Positively charged microfibers attract negatively charged dust and dirt for improved cleaning performance

**Microfiber Mop** results in exceptional cleaning over conventional loop mops.

**Traditional Mop** leaves the majority of dirt and dust on the surface.

### *Microfiber Traits*

- Washable up to 160° F
- Wet or dry use
- Increased durability
- Cleans and dries 3x faster

## G2 Wet/Dry Mop

All-in-one for both wet and dry mopping. The G2 Wet/Dry Mop can be used either wet, dry or as a damp duster, which can help minimize airborne particles. This unique mop is made from two layers of 100 percent split microfiber. The primary layer of split fiber is designed for maximum cleaning results, accompanied by a second layer of spun microfiber for absorption and longevity.

Item No.	Description	Pkg
MDT217720	18" G2 Wet/Dry Mop, Blue	100 ea/cs

Please see page 3 for our greengmart program details.

## Advantage Wet Mop

The advantage of this mop is the 100 percent microfiber in the middle of its pad. Its construction is similar to the MicroMax Wet Mop (see next page); we simply replaced the foam layer with microfiber to make the Advantage Wet Mop more durable and last twice as long. The Advantage Sweep Wet Mop has all the same great benefits plus 100 percent split microfiber fringe sewn around the edges for more effective dusting.

Item No.	Description	Pkg

MDT217771	18" Advantage Sweep Wet Mop	100 ea/cs

## PolyPro Wet Mop

Poly fill, same great benefits. This polyester-filled microfiber mop has the same great benefits as the MicroMax Wet Mop but features a poly fill. The durable polyester material placed inside the mop withstands dryer heat better than foam.

Item No.	Description	Pkg
MDT217520	18" PolyPro Wet Mop	100 ea/cs

## MicroMax™ Wet Mop

Cleaning at a microscopic level. This wet mop has double-layered construction with an outer layer of 100 percent twisted microfiber (80 percent polyester/20 percent polyamide fibers). The inner layer is made of high-density foam for increased absorption. The MicroMax Select Wet Mop has five color strips on the back of the mop for easy color coding.

# These Looped Mops Are Made From ENTIRELY Recycled Materials!

People worldwide are looking for opportunities to contribute to improving the current state of the Earth’s ecosystem. One such effort is the use of engineered fibers produced entirely from recycled materials, which include reclaimed components such as cotton and PET plastic bottles. By incorporating recycled PET plastics into new, usable goods we can effectively diminish waste going into our landfills while also conserving the raw natural resources that would otherwise be used for the same purpose.

## Superior Loop Mops

Maintaining a clean healthcare environment comes with special challenges. Our Superior Loop Mops will provide the “heavy lifting” required to meet your daily facility service sanitary requirements and needs. Our loop mops perform best moving debris and picking up large bio-spills.

Our line of loop mops are designed for exceptional strength and absorption that will withstand multiple washings. Medline’s industry preferred yarn blend is a favorite in large volume laundry operations. The recycled yarn blend is made from post-consumer waste. The yarns we use were developed to reduce its impact on our planet while maintaining the yarn’s integrity during commercial use.

- Unique 4-ply (recycled) yarn blend
- Poly mesh Headband dries quickly and will not mildew or discolor
- Open looped construction prevents fraying and minimizes linting
- Fantail spread covers more floor per sweep - reduces time and labor cost
- Double stitched tailbands secure yarn to prevent tangles
- Grown & sewn in the USA

### Dispatch® Hospital Cleaner Disinfectant with Bleach

**Help wipe out MDROs in just one minute, and C. difficile spores in five minutes.**

Dispatch® spray is a multipurpose, broad-spectrum cleaner disinfectant that kills pathogens fast. Its sodium hypochlorite and detergent solution is similar to the 1:10 bleach solution recommended by the CDC for effective disinfecting. Dispatch can be used on medical equipment such as autoclaves, blood glucose monitors, IV poles, exam tables, respiratory equipment, transducers, and more. It's also effective on most hard, nonporous surfaces including steel, glazed tile, painted surfaces, plastics and more. It meets OSHA standards for protecting healthcare workers from bloodborne pathogens.

## The fastest EPA-registered kill time for *Clostridium difficile* spores\*

*Clostridium difficile* presents a unique and growing challenge to healthcare providers and institutions. This challenge is complicated by the organism's microbiology, its infective nature, broad-spectrum antibiotic use and by the susceptibility of older or immunocompromised patients<sup>1</sup>.

**“The CDC encourages the use of an EPA-registered disinfectant for *Clostridium difficile* in patient care areas”<sup>2</sup>**
