

Protect your Eyes and Face in Comfort

Infection prevention never looked so good

The CDC recommends the use of eye protection to provide a barrier to prevent infectious materials from entering the eyes. Googles® are the perfect choice for today's healthcare professionals concerned about exposure to infectious disease, OSHA compliance and comfort.

Googles eye shields and full face shields protect healthcare workers' eyes and face from the splattering of blood-borne pathogens. Googles are lightweight, comfortable and easy to use. The ergonomic design fits comfortably on your face with or without glasses. Frames are available in fun, assorted colors to personalize your eyewear. The economical, disposable lenses have side-shield protection and are made of distortion-free, optical grade plastic. The frames are reusable and can be placed in an autoclave.

Googles Features and Benefits:

OSHA compliant

Side-shield protection

Distortion-free, optical-grade plastic lenses

Fits easily over glasses and loupes

Secure fit, won't slip off

Autoclavable frames

Clear Lens

Protects your eyes from splattering blood-borne pathogens.

Amber Tinted Lens
