

The Winco Recliner Collection

Designer Care Cliner

The Designer Care Cliner Series combines sleek design with soft urethane arms creating a unique blend of durability, beauty and unmatched patient comfort. The result is a recliner that offers practical clinical features required for efficiency and utility presented in a distinctly non-clinical package.

- Configurable for a wide range of applications in fixed or swing arms, standard or XL sizes
- A versatile design that integrates urethane arms and offers a selection of attractive wood arm and table options.
- Beauty, practicality and durability all in one flexible design

The Designer Care Cliner is clean lines, sleek well-proportioned seating surfaces and, of course, the unmatched patient comfort upon which we have built our name. This collection offers an impressive array of design features and options that allow you to perfectly match your application, design setting and patient treatment needs.

FLEXIBILITY IN APPLICATIONS

The beauty of the Designer Care Cliner extends to its flexibility for a host of applications. Fixed arm models are perfect patient or general room chairs. Patient transfer from wheelchair or bed to gurney or floor for emergency CPR is easier, safer and faster with the new dual swing-away arm models. In addition the swing arms allow clear access for faster, thorough cleaning of all areas of the chair. Available XL models gracefully and comfortably provide wider seats and higher weight capacities without any sacrifice in aesthetics.

LOCK-BAR

Lock-bar models accessible only by the caregiver securely maintain selected patient positioning when required.

CASTERS OR PEDESTAL FEET

Designer Care Cliner is available with 3" or 5" casters, depending on the model. Opting for fixed pedestal feet can enhance the rich and warm home furniture appeal.

TRENDELENBURG

For Clinical applications Trendelenburg positioning is available and operated from either side of the chair with a full width positioning bar.

DECORATIVE WOOD ENHANCEMENTS

Two styles of optional wood arms can replace the soft and durable standard black urethane arms. The wide version mimics the lines of the urethane arm retaining the design flare and overhang for easier patient grip. A sleek narrow version offers a distinct flush design for an even more contemporary appearance. Either version is available in rich, dark or light tones to elegantly complement or contrast the upholstery choice.

Available side table options include non-porous, blow-molded plastic (standard on some models), or wood tones matched to the wood arm choices. The wood options elegantly accentuate color choices and can transform the ambiance of any setting.
